

EnTrade – Data collection App proposal

Valuing the environment without costing the earth

EnTrade

Wessex Water
YTL GROUP

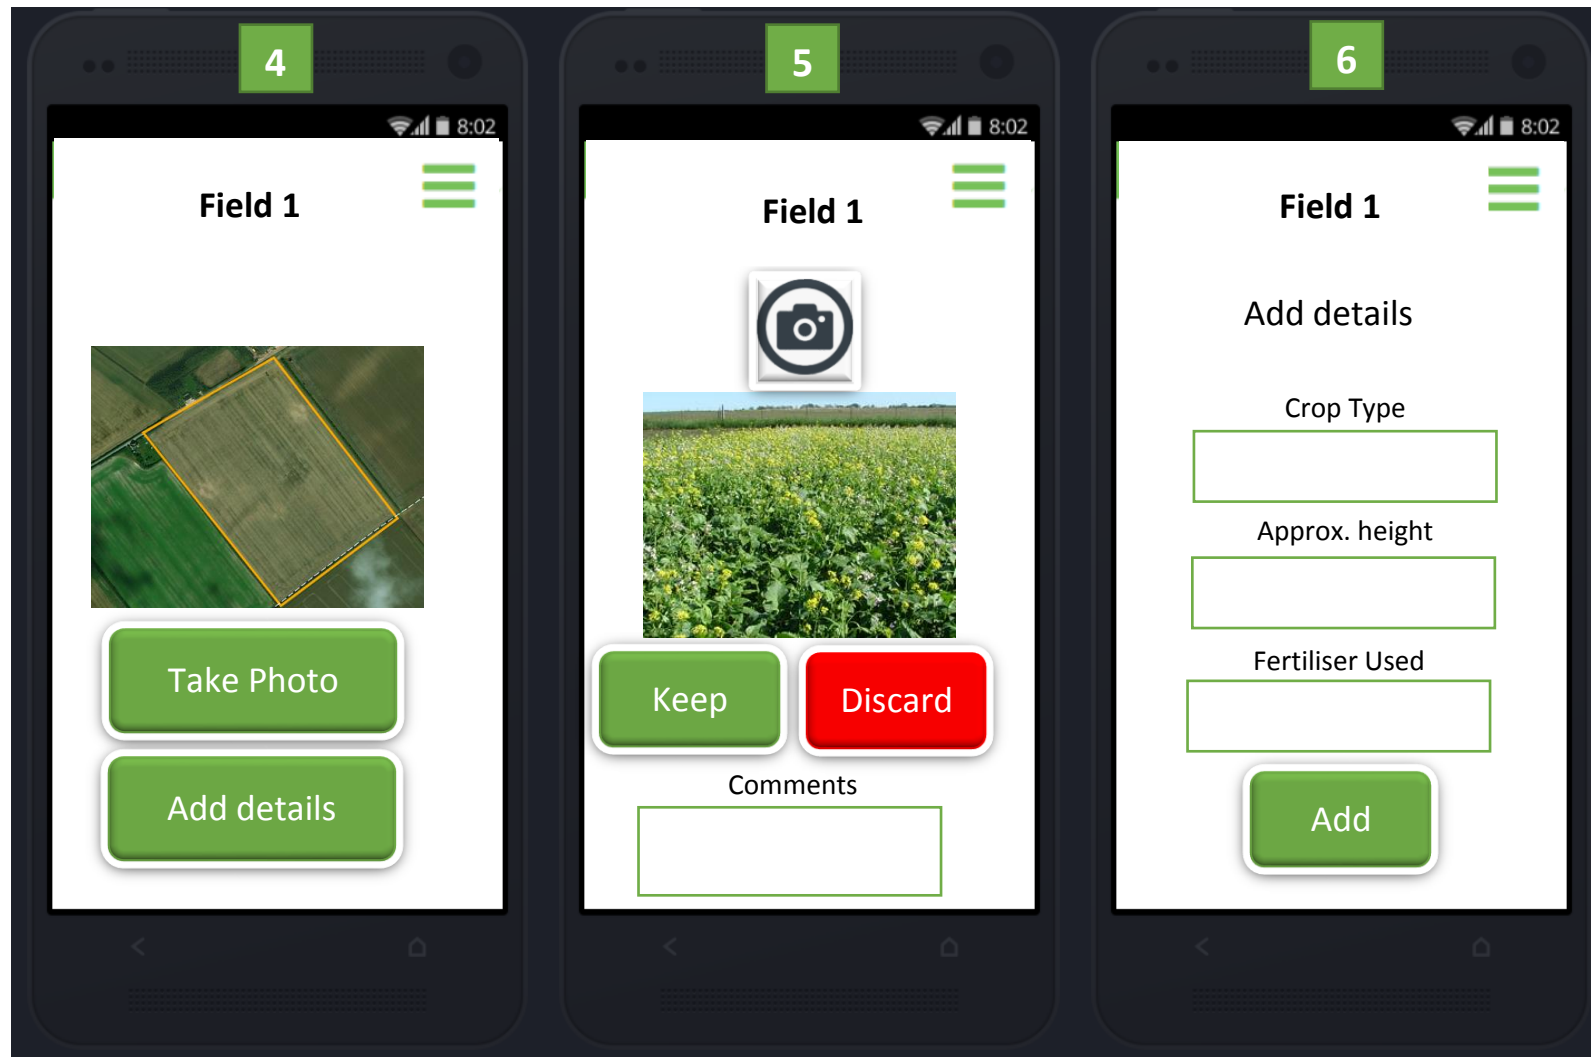

1. User is asked to log-in. After first log-in details are remembered and not asked for again on the device

2. User and password details are the same as on the main site.

3. Menu contains – user guide and contact us page, both web pages from the main app. Also includes navigation within app (My fields and log out)

User is given a drop down menu with the named field from all their successful bids. These are marked in the main auction site

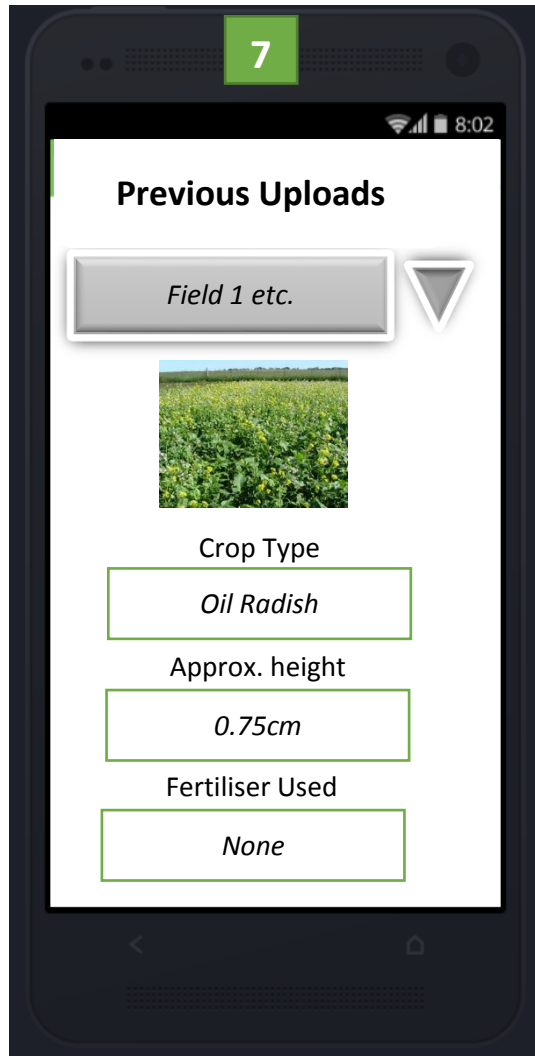

User can also view previous uploaded photos

4. Once a field is selected a photo of uploaded area is shown. User is given two options, take a photo or add details.

5. If the user clicks 'take photo', they are taken to Screen 5. By clicking the camera icon, the camera launches and you can take a photo. Once the photo has been taken have the option to keep or discard, and to add any comments as necessary

6. Add details. The options on this page will depend on the auction type

7. Previous data viewed. Each Field can be viewed by clicking on the drop down.

Outside of App

Buyer in auction should be able to view all uploaded data, including metadata for the photos. Particularly important for the photo is location and time taken.
